PROFESSIONAL SUMMARY

A frontend developer is a crucial part of web development, responsible for creating the user interface and experience that visitors interact with on a website or web application.

They specialize in HTML, CSS, and JavaScript, crafting visually appealing and intuitive layouts while ensuring seamless functionality across different browsers and devices.

With a keen eye for design and a deep understanding of coding languages, frontend developers play a vital role in bringing digital experiences to life.

Their expertise bridges the gap between design and technology, ultimately shaping the way users engage with online platforms.
